DETAILED ACTION

This is in response to amendment filed on 9/15/03 in which claims 1-29 are pending. The applicant's amendments have been fully considered therefore this case is in condition for allowance.

Reasons for allowance

The following is an examiner's statement of reasons for allowance: the present invention teaches a training method for use with a pulse code modulation (PCM) modem system. The closest prior art of Chung U.S. Patent No 4,995,057 teaches a similar method. However the closest prior art fails to anticipate or render obvious the recited features: wherein said adjusting step comprises the step of decreasing the number of redundancy bits associated with line coder as recited in claim 1; said training sequence having a less-colored spectrum, relative to said colored transmit signals, over a limited bandwidth, wherein the spectrum of said training sequence is characterized by a reduction in DC suppression relative to said transmit signal as recited in claims 4, 12, 14, 20, 23; a logic circuit element to generate a predetermined sequence, wherein said predetermined training signal includes a second portion characterized by a color spectrum over said predetermined bandwidth, relative to the spectrum of the first portion as recited in claims 5, 10, 16, 18, 24 and 28. In combination with the rest of the system these features have been recited in all independent claims and render them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
